38 SB Silverton Windshield Cover

Instructions

1. Install track to underside of bridge with $\frac{1}{2}$ in screws provided. Start track at the seam in the windshield, not shown in this picture.

Repeat on opposite side. Slide windshield cover into tracks. Position the cover so the rope is even with end of track. Install the button at the pointed aft end of windshield.

2. Pull the corners tight and install one button on each side. Install the buttons on each seam, then go back and install the remaining button to complete the cover.
